Courier Management System in Odoo

Odoo Parcel Management System

We offers a comprehensive Parcel and Courier Management System, designed to streamline the operations of courier service providers. This robust application seamlessly integrates into the Odoo ecosystem, empowering businesses with a centralized platform to manage their courier and parcel services efficiently.

With the Odoo Courier Management System, you can create courier requests for your customers, capturing essential details such as sender and receiver information (name, address, contact details), courier specifics (kilometers, distance charges, additional fees), and parcel details (quantity, weight, dimensions). The system intelligently calculates the total charge for each courier request, ensuring accurate billing.

Enhance your service with the ability to upload parcel images directly to the courier request, providing visual documentation for your customers. Additionally, you can capture digital signatures from senders, adding an extra layer of security and accountability to the process.

The Odoo Courier Management System allows you to define various stages for each courier request, such as "collected," "dispatched," and "delivered," enabling you to track the progress of each shipment seamlessly. Customer invoices can be generated directly from the courier requests, streamlining your billing process.

Elevate your customer experience by leveraging the integrated website portal feature. This feature empowers your customers to view their courier requests, sort and

filter them based on various criteria, and print or download request details as PDF files. Customers can also view parcel images and sender signatures directly from the portal, ensuring transparency throughout the delivery process.

To further enhance customer satisfaction, the Odoo Courier Management System incorporates a rating feature. Send courier request rating emails to your customers, allowing them to provide valuable feedback on your services. These ratings are seamlessly integrated into the corresponding courier requests, enabling you to identify areas for improvement and maintain high service standards.

Empower your customers with real-time tracking capabilities through the website portal's dedicated tracking feature. Customers can effortlessly track their courier requests using unique request numbers, ensuring they stay informed about the status of their shipments at all times.

The system also provides advanced dashboards and important reports, empowering you with comprehensive data visualization and actionable insights. These powerful tools enable you to monitor key performance indicators, analyze trends, and make informed decisions to optimize your courier and parcel management operations.

With its comprehensive suite of features, the Odoo Courier and Parcel Management System optimizes your courier operations, enhances customer satisfaction, and positions your business for success in the competitive world of courier and parcel services.
